- NON-CARCINOGENIC
- HYPO-ALLERGENIC
- NON-TOXIC
- NON-CORROSIVE
- NON-FLAMMABLE
- USER FRIENDLY

OIL-OUT ENZYME CONCENTRATE

DIRECTIONS

FOR SWIMMING POOLS:

INITIAL TREATMENT: Add 1 oz. of Bio-Dex Oil-Out Concentrate per 20,000 gallons of water applied slowly through the skimmer while the filter is running, or apply directly in the water where oil concentration is most severe. Removes body oil on contact. If oil problem is extreme, it may be necessary to repeat dosage after 96 hours (4 days).

MAINTENANCE TREATMENT: Add 1/2 ounces of Bio-Dex OIL-OUT Concentrate per 20,000 gallons of water weekly or as often as needed. Swim immediately after treatment. No waiting.

FEEDER APPLICATION: Bio-Dex Oil-Out Concentration needs to be diluted in a 20 to 1 ratio to get the optimum results. Dilute 1 quart into 5 gallons of water using a chemical feeder pump. Adjust settings according to bather load.

Bio-Dex OIL-OUT Organic Water Cleaner digests and converts oils, grease, and all other type oil products to carbon dioxide and water. OIL-OUT leaves no undesirable residual and is safe to the environment and people. It is always good practice to keep all chemicals in a safe, secured place away from children.

CAUTION:

Do not mix with other pool or spa water chemicals. Apply separately.

STORAGE:

Keep OIL-OUT away from extreme heat.

CLOSING & WINTERIZING SWIMMING POOLS:

OIL-OUT is an excellent additive for winterizing swimming pools. Just add five oz. of OIL-OUT per 1000 gals. of pool water. Allow to circulate for 6 hours, then add the additional winterizing Bio-Dex chemicals.

OPEN POOLS AS FOLLOWS:

1. Vacuum pool. 2. Test water pH, chlorine residual, total alkalinity calcium hardness & conditioner. Your professional pool dealer is equipped to perform these tests and offer advice. 3. Shock pool, add one ounce per 20,000 gallons of Bio-Dex Oil-Out Organic Water Cleaner. Add one quart of Bio-Dex Protect-All Stain and Scale Control per 20,000 gallons pool water. Bio-Dex Organic Water Cleaner is compatible with most pool & spa chemicals. 4. Follow the advice of your professional pool dealer or service technician for proper maintenance and care of your pool, spa or hot tub.

Bio-Dex OIL-OUT improves filtration, water clarity and sparkle, while keeping cartridge, sand and diatomaceous earth filters free and clean of oil related residue. Eliminates oil and scum build-up on tile. It may take 2 or 3 treatments to remove the scum that has built up over a period of time. For scale build-up on tile, use Bio-Dex #300 Tile Cleaner.
