

BIO-DEX

SUPER CONCENTRATED PROTECT-ALL SUPREME

Use at all pH levels

One qt. treats 20,000 gallons.

Maintenance dose: 3-4 oz. a

week, or 12 oz. a month per

20,000 gallons.

Controls swimming pool stain,
scale & corrosion, plus treats
water hardness problems.

- No Phosphonic Acid
- No Phosphoric Acid
- User friendly
- Environmentally safe
- Available in quarts, gallons
and spa sizes

A great product to use when
filling a new pool, and a must
for keeping the pool surface
looking like new!

A Bio-Dex Laboratories
SPECIAL FORMULATION!

PROTECT-ALL SUPREME

Bio-Dex **Protect-All Supreme** is compatible with chlorine, acid, other type sanitizers and most generally accepted pool water chemicals. **Bio-Dex Protect-All Supreme** is synergistic with algicides and the addition of one quart per 20,000 gallons pool water enhances algicides. Consult a professional pool dealer or professional pool technician.

CAUTION

Keep out of reach of children and away from food. Do not take internally. Do not get in eyes, and avoid prolonged contact with skin. Wear protective eye goggles and rubber gloves when handling. Corrosive material.

FIRST AID

Eye Contact: Flush eyes for 15 minutes with lots of running water. Get immediate medical attention. **Skin Contact:** Wash with lots of running water for 15 minutes. If irritation develops and persists, get immediate medical attention. Swallow: Give lots of water. Get immediate medical attention.

STORAGE AND DISPOSAL

Keep out of reach of children and away from food. Do not take internally. Do not get in eyes, and avoid prolonged contact with skin. Wear protective eye goggles and rubber gloves when handling. Corrosive material.

GENERAL

Bio-Dex **Protect-All Supreme** is non-flammable, non-carcinogenic and non-corrosive in use dilution. Bio-Dex **Protect-All Supreme** is stable at all pH values, at high temperatures and provides control of problem causing metals in pool and spa and hot tub water. Bio-Dex **Protect-All Supreme** is a product of choice for the solution to metal problems in pool and spa and hot tub water. It inhibits scale formation and protects equipment from rust and corrosion when used as directed.

DIRECTIONS:

One qt. treats 20,000 gallons. Maintenance dose: 3-4 oz. a week, or 12 oz. a month per 20,000 gallons.

1. NEW POOL: Follow the pool builders instructions.

2. EXISTING FRESHLY FILLED POOL: Dosage-With filter system and water circulating, add one quart (32 fl. oz) of **Protect-All Supreme** per 20,000 gallons of pool water by distributing around perimeter of pool water away from eyes and face.

If calcium hardness is above 250 ppm, or iron exceeds 1 ppm, add a second quart of **Protect-All Supreme**. Wait 24 hours and test pH and adjust if required.

Add chlorine per your professional pool dealer's directions. Your professional pool dealer is best equipped to perform water testing. Maintain water pH in range of 7.2 to 7.6.

3. EXISTING IN-USE POOL, PRE-SWIMMING SEASON START-UP, OR WINTERIZING POOL: Dosage-Add one quart (32 fl. oz.) **Protect-All Supreme** per 20,000 gallons water per above procedure. Follow above parameters regarding second quart application.

4. POOL WATER MAINTENANCE: Dosage-Add 3 to 4 oz. **Protect-All Supreme** weekly, depending on water hardness and water quality. Consult your professional pool dealer or your professional pool service technician for additional assistance. Have pool water tested regularly and maintain pH range 7.2 to 7.6 and correct chlorine residual.

5. SPAS, HOT TUBS, AESTHETIC POOLS: Dosage-Add 1 oz. **Protect-All Supreme** per 500 to 750 gallons of spa water. Add 1/2 oz. weekly thereafter. Always add **Protect-All Supreme** with water circulating and the filter system operating.

Protect-All Supreme reduces phosphate levels,
controls stain, scale, corrosion and
water hardness problems
