TOTAL TILE CARE SYSTEM

A Unique Four Step System That Guarantees The Total Care, Cleaning and Protection of Swimming Pool Tile

Keep your tile looking new!

This easy four step system developed by Bio-Dex Laboratories is the first system that completely addresses the cleaning, care and protection of swimming pool tile.

TOTAL TILE CARE SYSTEM

The Bio-Dex Total Tile Care four step system will save hundreds, even thousands of dollars spent cleaning or replacing swimming pool tile, only to have those same problems constantly reappear, which could cause irreversible damage to the surface of the tiles.

With this system, tile maintenance will never be easier. It will provide beautiful swimming pool tile forever with regular use by removing the unsightly scale buildup that makes swimming pools appear old, unattractive and uncared for. The Total Tile Care System has the added benefits of stain prevention throughout your pool as well as protecting expensive pool equipment from rust, corrosion and scale.

STEP 1. BIO-DEX PROTECT-ALL SUPREME: This product is a special formula that was developed to maintain control over hard water, well water, rust, corrosion and metal problems. In addition to tile, it also prevents calcium and scale buildup as well as staining on pool interior surfaces below the water line. One quart treats 20,000 gallons.

STEP 2. BIO-DEX 300 TILE CLEANER: This product will remove calcium deposits - fast! It will dissolve calcium, oil, grease and most soils in just minutes! Can be used directly on very heavy calcium deposits. Bio-Dex #300 Tile Cleaner must only be used on calcium deposits and applied according to the directions located on the bottle.

STEP 3. *TPS TILE PROTECTANT AND RESTORATIVE: This product is the finishing touch that will give tile and pebble pool finishes a long-lasting fresh new "wet look". TPS will also restore the original beauty of pool finishes, sealing them in to make all future cleaning quick and easy. (The TPS product included in this system is 16 oz. size.)

STEP 4. BIO-DEX QUICK 'N THICK TILE CLEANER: This product is designed for the maintenance cleaning of tile and pebble finishes after sealing. It can be applied to a pool brush to clean dirt and debris off tile and water features as needed. Quick 'N Thick is also an excellent vinyl liner cleaner and can be used as often as needed.
